BELGIUM

AGENDA

On the agenda of the Council's meeting today is the proposal for a response to the military invasion by the Deneski Federation of Lodovna.

Member states will discuss sanctions, aiming to reach a compromise.

YOUR OPENING SPEECH:

Thank you, Madam/Mr President,
for giving me the floor.

We argue that the following resources should be sanctioned: … (fill in) …

We are willing the contribute the following amount: … (fill in) …

We are confident that we will be able to find a workable compromise in the course of this meeting.

Thank you

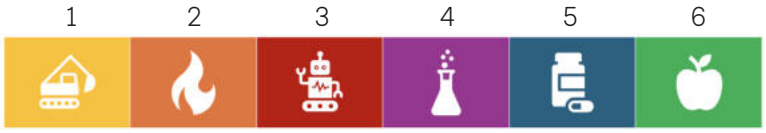

BACKGROUND INFORMATION

Sanctions = restricting the trade of certain resources between your country and the Deneski Federation. By doing this, the EU can weaken their economy and limit their ability to wage war. However, broad sanctions come with risks as your own economy may rely on some of the resources coming from the Deneski Federation.

Trade overview:
Below is an overview of the **most important resources for your country**. You will also find a list of **resources traded between the Deneski Federation and the EU**. In both cases, the resources are ranked in order of importance, from most to least.

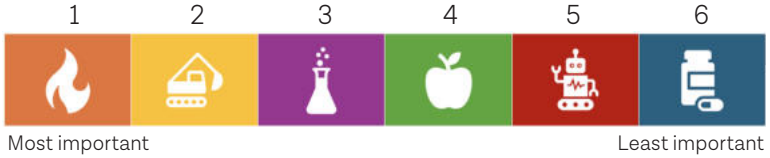

1. Resources for your country:

Goods important for: **Belgium**

2. Resources important to Deneski in trade with the EU:

Goods important for: **Deneski Federation**

BULGARIA

Proposal for a

ECONOMIC SANCTIONS ON THE DENESKI FEDERATION

due to their illegal invasion of the Republic of Lodovna

CONTEXT OF THE PROPOSAL

The recent decision by the Deneski Federation to start a full-scale invasion of the Republic of Lodovna violates all existing international rules and norms.
As a result, the EU feels compelled to take a united stance and respond by exerting maximum economic pressure on the Deneski Federation. This will be done by imposing sanctions on several key raw materials traded between the EU and the Deneski Federation.

THE PROPOSAL

Trading the following resources between EU-member states and the Deneski Federation will be prohibited:

Resource			Cost
	Food	*Basic necessities such as grain, meat, and dairy.*	25
	Chemicals	*Industrial and agricultural chemicals (fertilizers, plastics, solvents) — often strategically important in industry.*	24
	Energy	*Oil, gas, and coal — the backbone of economies, crucial for transport, industry, and heating.*	30
	Minerals	*Raw materials such as iron ore, copper, and nickel — essential for the production of steel, batteries, etc.*	20
	Medicine	*Pharmaceutical products and medical supplies — important for public health.*	25
	Technology	*Advanced technology such as semiconductors, telecommunications equipment, and machinery.*	25
